Professional, Efficient Industrial Construction

Southern Industrial Constructors (SIC) provides professional plant construction services to the manufacturing and industrial markets across the Southeast and beyond.

For six decades, we've been specializing in constructing industrial environments that deliver longevity and flexibility. We're known for our intricate familiarity with industrial projects of all kinds—so you can trust us with even your toughest specifications.

Experts in Every Aspect of Industrial Construction

SIC's highly-skilled and qualified merit-shop workforce can manage a comprehensive range of industrial construction services, including:

- » Mechanical
 - Machinery installation and relocation
 - Equipment setting, rigging, and millwrighting
 - Process and utility piping/process ductwork
- » Electrical
 - Power, instrumentation, and controls
- » Civil
 - Concrete construction, precision, and heavy foundations
- » Structural
 - Steel fabrication and erection
- » General construction
 - Building construction, deconstruction, and demolition
- » Subcontractor management
 - Insulation, painting, buildouts

Full-Service to Help Ensure On-Time, On-Budget Completion.

Our capabilities span from turnkey delivery of multi-discipline, multi-craft projects to single-service, single-craft needs, including:

- » New construction
- » Greenfield site development
- » Existing facilities
 - Expansions
 - Modifications
 - Upgrades
 - Shutdowns
 - Turnarounds
