PLANT INSTALLATION

High-Quality, Cost-Effective, Turnkey Plant Installation Services—for Over 55 Years

Southern Industrial Constructors (SIC) provides professional plant installation services to the manufacturing and industrial markets across the Southeast and beyond. Whether it's one machine, a whole production line, an entire industrial process system, a complete plant, or the consolidation of multiple plants, we relocate and install machinery, equipment, and systems wherever they're needed. Utilizing a talented team of riggers, millwrights, pipefitters, welders, fabricators, and electricians, SIC is positioned to handle all your plant installation and relocation.

An Industry Leader That Handles It All—Safely and Comprehensively

Proper machinery installation is a fundamental step to maximizing reliability and minimizing lifecycle costs. Conversely, improper installation can lead to unexpected downtime, poor product quality, reduced capacity, and higher-than-expected operating costs. No matter the type of machine or equipment, and no matter the size of your operation or the complexity of your project, SIC has the expertise required to properly handle virtually every element of plant installation, including:

- > Pre-construction planning and budgeting
- > Project management and scheduling
- > Unloading, uncrating, and staging
- > Receiving, off-loading, and storage
- > Temporary off-site warehousing
- > Inventory management
- > Disassembly and assembly of equipment and process systems
- > Site preparation and equipment layout
- > On-site laydown
- > Machinery installation and relocation, equipment setting, rigging, and millwrighting
- > Manufacturing line installations
- > Setting, aligning, and leveling
- > Installation and connection of mechanical and electrical
- > Commissioning and run-in
